

4. Analysis of feedback

4.1 Demographics

In order to enable us to ascertain whether we were reaching a wide and representative range of people within our communities, a small amount of demographic information was requested.

The main information related to the age of respondents and their geographical location or local community.

Five hundred and thirty nine respondents provided information on their age.

Fifty-five respondents stated that they were out of district ratepayers. Respondents demographics were varied through the region.

Fifty-five respondents stated that they were
